SUMMARY

I am a Computer Application student currently in the seventh semester at Tribhuvan University. I have completed an internship where I worked on a Flutter-based mobile app that communicated with the Odoo backend. I am also skilled in designing user interfaces (UI) for mobile and web applications. My web development experience includes working with Laravel, HTML, CSS, and JavaScript. Some of my projects include an e-commerce website and a course-selling platform with eSewa payment integration. I enjoy creating clean, user-friendly designs and building applications that solve real-world problems.
